

Eternal flame of Christmas

The Christmas tree has been re-imagined as an Eco-friendly Celebration of the Eternal Christmas Flame. The design takes inspiration from the Warmth and Candles that light up the Christmas season.

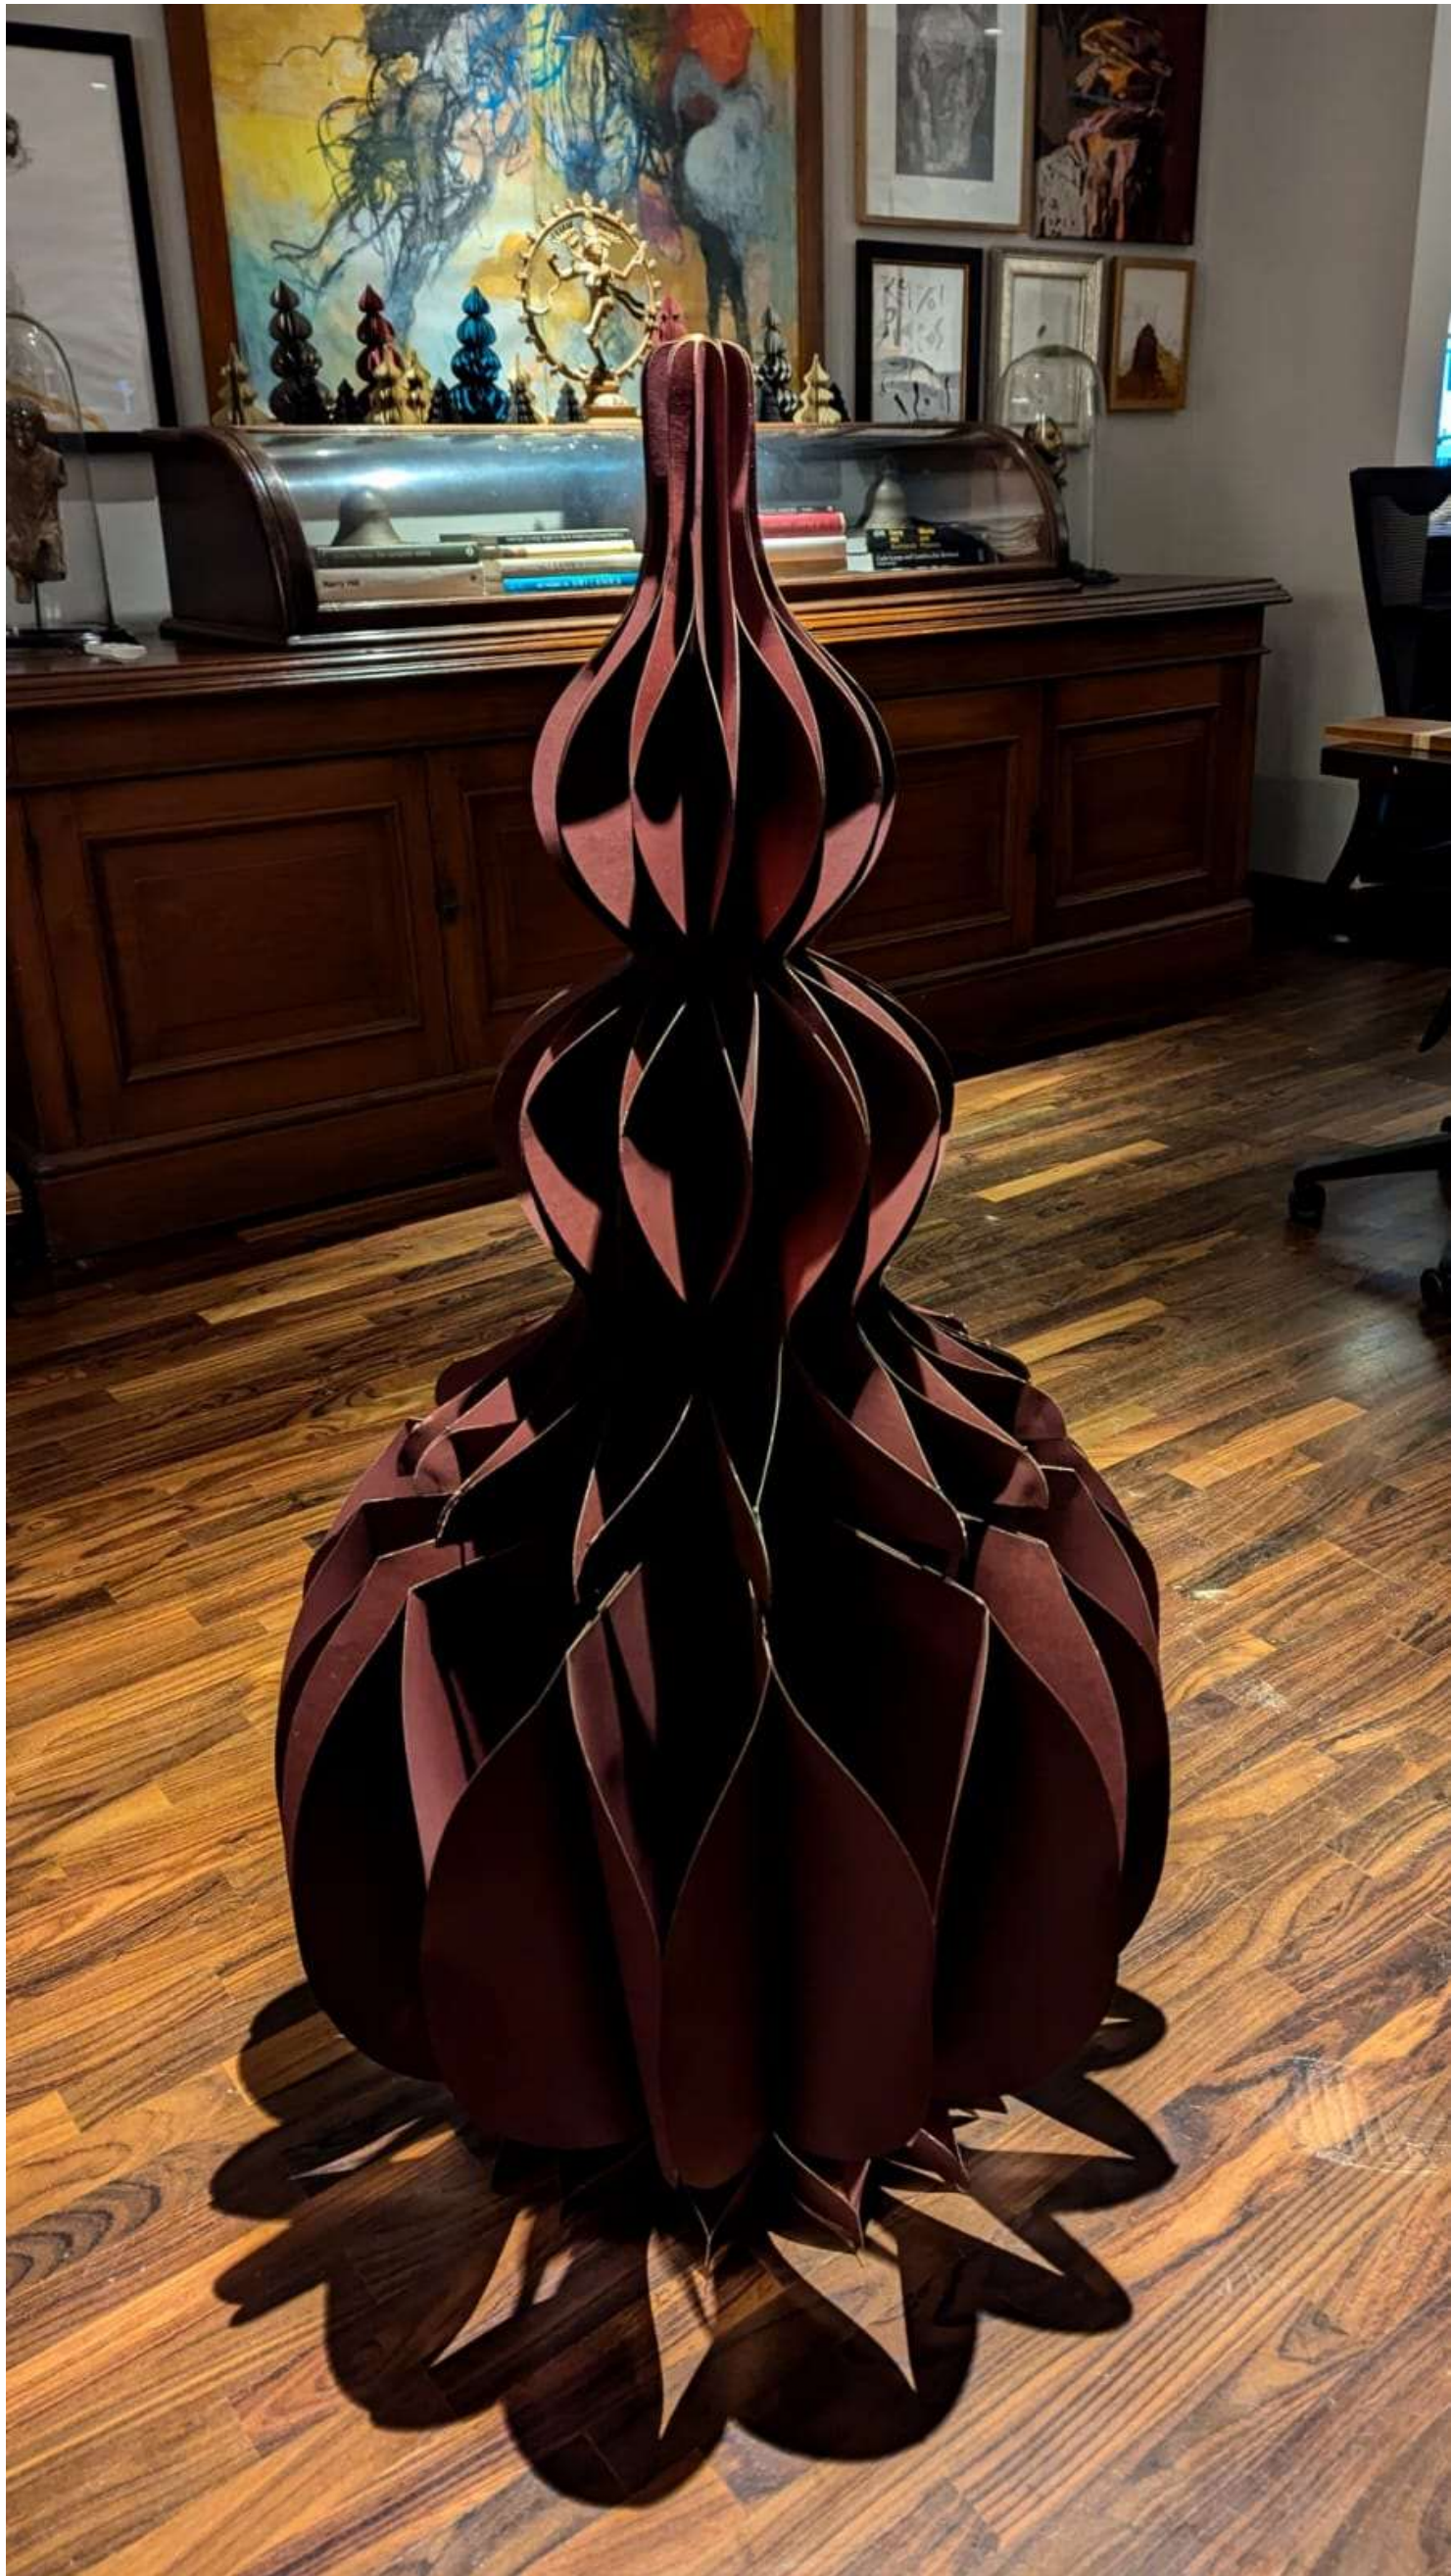

The design takes the shape of a towering flame, crafted entirely by hand and purely from Paper.

When illuminated, it casts mesmerizing flame-like shadows, creating a dynamic and enchanting interplay of light and form.

The structure is 100% eco-friendly, and completely handmade using biodegradable paper, ensuring zero waste. It is fully dismantlable, making it durable and reusable for years to come.

The design not only celebrates Christmas without harming nature but also embodies the spirit of renewal and preservation, ensuring a greener and, brighter future.

How it was made ...

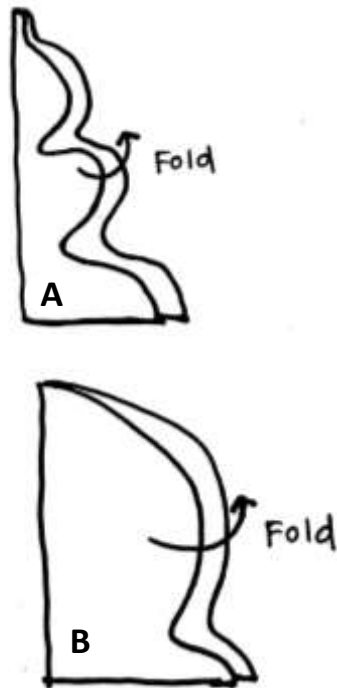

Material used:

30 Sheets of Colored paper / glue / sticks

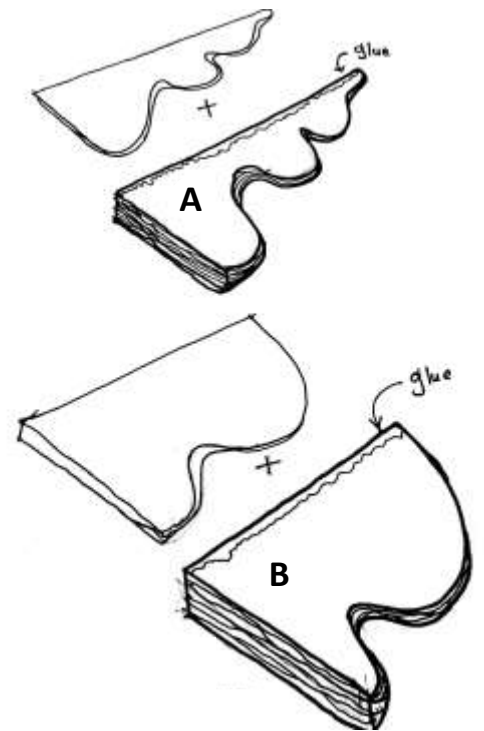

1 Cut out the profiles A & B [15 of each]

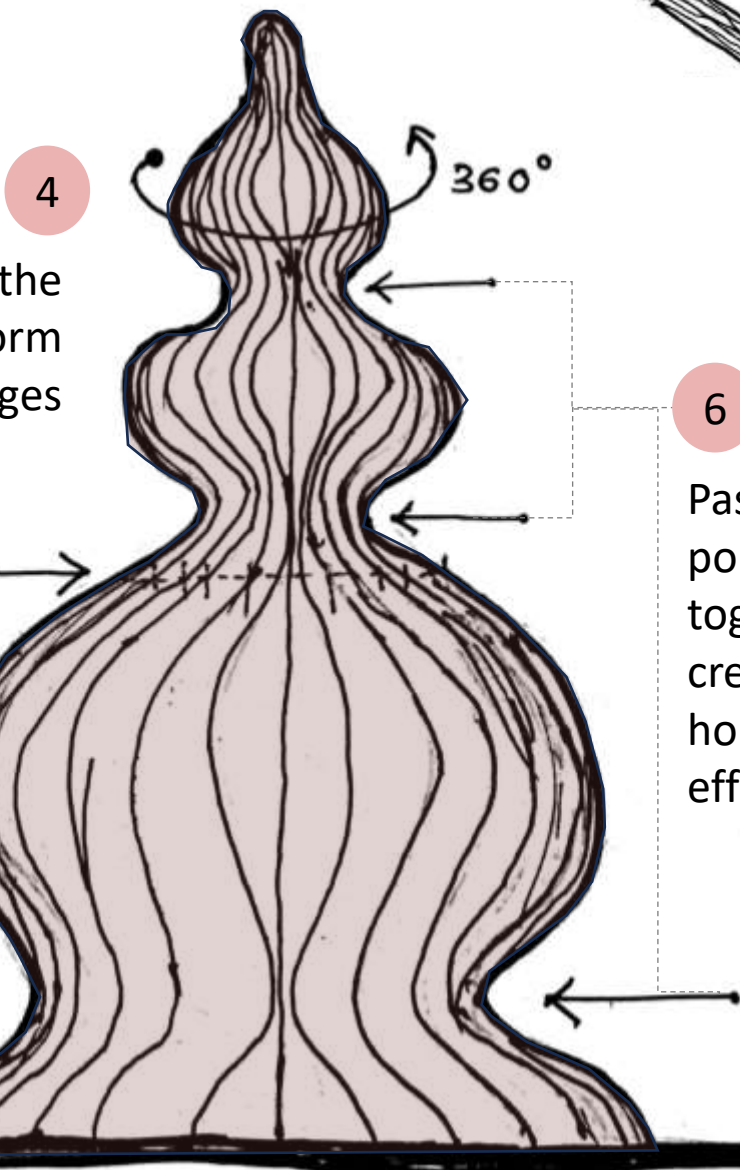

2 Fold each profile into two from the center

3 Glue the inner edges of all the folded cut outs together forming a stack and leave to dry

4 Open up the stack from the spine to create a 360 form and paste the meeting edges

5 Join the two parts of the tree using sticks and glue

5

6 Paste these points together to create the honeycomb effect.
